

Technical guide

For technology, software, or systems

01

Getting started

INTRODUCTION

Overview

Provide a high-level overview of the technology, software, or system. What is its core purpose or functionality?

Purpose

Explain the key reasons or use cases for leveraging this technology, software, or system.

Key features

List the technology's major features and capabilities.

→ Key feature 1

→ Key feature 2

SYSTEM REQUIREMENTS

Note the minimum hardware specifications as well as any required software dependencies or compatible operating systems.

→ System requirement 1

→ System requirement 2

INSTALLATION

Step-by-step instructions

Add a quick introduction and detailed instructions for each task.

Task 1

STEP 1

→ Detailed instructions

→ Detailed instructions

STEP 2

→ Detailed instructions

→ Detailed instructions

Dependencies

Summarize dependencies, and list the dependencies and installation instructions.

Dependency 01

→ Instructions for installation

Dependency 02

→ Instructions for installation

Third-party components

Summarize third-party components and list installation instructions if applicable.

Third-party component

→ Instructions for installation

Third-party component

→ Instructions for installation

CONFIGURATION

Add key configuration settings and parameters of the technology, software, or system.
